Experience

Dec 2021 - ongoing

Front-End • Sweden
Consid AB
I am currently managing and developing an existing e-commerce website, as well as working on a new component library project. I am working with server-side rendering to improve load times and reduce data transfer. I am utilizing code splitting and lazy loading to improve performance by only loading necessary components and resources. I am also optimizing images and other media assets to reduce file size and improve loading times.

2020 - 2021
Front-End • Argentina
BeeReal
Led the development of an external website for BeeReal as a solution architect, utilizing React Native, Redux, Firebase to create a seamless and intuitive user experience. Implemented blocks and modules with associated styling for a new mobile app, improving the overall design and functionality.

Oct 2021 - Dec 2021
Front-End • Argentina
IT - Resources
Contributed to the development of a web application using React and React Native, focusing on expanding features and refining processes. Improved the overall user experience by implementing new features and optimizing usability standards. Worked within the Agile Scrum framework to deliver high-quality results on a tight timeline.

* Currently living in Sweden (I have permit to work).
